

Ground Support Case Studies

Grouting and Excavation Support in Doha—Simple, but Challenging – *Thurner, R., Raja, S.U. and Kulmer, R.*

Ground Support Practice at Glencore’s Nickel Rim South Mine—With a Link to Seismic Monitoring Data – *Simser, B. and Butler, T.*

Ground Support for Mining Through Weak Graphitic Faults at the Casa Berardi Mine, Quebec – *Armatys, M. and Board, M.P.*

Mining in Extreme Squeezing Conditions at the Henty Mine – *Roache, B.*

A numerical modelling case study - correlation of ground support instrumentation data with a three dimensional inelastic model – *Sweby, G.J., Dight, P.M., Potvin, Y. and Sharrock G.*

Tunnelling and Reinforcement in Heterogeneous Ground—A Case Study - *Lope Alvarez, D., Sjöberg, J., Eriksson, M., Bertilsson, R. and Mas Ivars, D.*

Ground Support Testing

Strain of Steel Rebar vs Rock Bolt Elongation on Laboratory Stand – *Korzeniowski, W.B., Skrzypkowski, K. and Herezy, L.*

A Follow up to the Behaviour of Cable Bolts in Shear; Experimental Study and Mathematical Modelling – *Aziz, N., Mirza, A. and Nemcik, J.*

Parametric study of cable bolt performance under axial loading in medium strength synthetic rock – *Li, D., Hagan, P.C. and Saydam, S.*

Drop Testing of Concrete Panels and Welded Wire Mesh at LKAB Kiruna Mine – *Swedberg, E. and Krutrök, B.*

Critical embedment length of fully grouted rebar bolts – *Li, C.C., Høyen, A.H. and Kristjansson, G.*

An optical sensor for capturing the three-dimensional bending of bolts – *Forbes, B., Hyett, A.J., Vlachopoulos, N. and Diedrichs, M.S.*

Numerical Modeling

The contact problem of the supported circular cylindrical underground opening in elastic rock – *Exadaktylos, G.E. and Stavropoulou, M.S.*

Advanced 3DEC bolt model for simulation of ground support performance in highly fractured and bulked rock masses – *Bouzeran, L., Furtney, J., Hazzard, J., Lemos, J.V. and Pierce, M.*

Numerical modelling of dynamic response of underground openings under blasting based on field tests – *Yi, C., Zhang, P., Nordlund, E., Shirzadegan, S. and Nyberg, U.*

Discrete element modelling of steel wire mesh and rockbolt plate – *Xu, C. and Tannant, D.D.*

Rock bolt behaviour in stress-fractured ground - A FE analysis using zero-thickness interface elements and fracture-based constitutive laws – *Fornia, A., Carol, I., Garolera, D., Kaiser, P.K. and Eberhardt, E.*

The use of elastic superposition as part of a multi-tiered probabilistic ground support design approach – *Wesseloo, J.*

Three dimensional numerical modelling of the deep Alborz tunnels with composite liners in squeezing condition – *Molladavoodi, H. and Bazidenho, H.*

Experimental and numerical analysis of face pressure in EPB shield in East-West lot of line 7, Tehran subway – *Maboudi, V., Molaei, F., Siavoshi, H. and Rahimi, S.*

Rock Slope Stabilization

A calculation model of fully grouted bolts in strength reduction FEM for slopes – *Wei, L. and Liu, W.*

An Analysis of the Effect of Freeze-Thaw Cycles on the Degradation of Mechanical Parameters and Slope Stability – *Li, J., Zhou, K., Liu, W. and Zhang, Y.*

Remediation of large scale structures in open pit mining – *Bergman, A.*

Building a structural model for assessing potential pit slope failure – a case of a Norwegian mine – *Morales, M., Panthi, K.K., Botsialas, K. and Holmøy, K.H.*

A proposed workflow for slope stabilization projects. The case of an open pit mine in Norway – *Botsialas, K.*

Photogrammetric calculation of JRC for rock slope support design – *Sirkkiä, J., Kallio, P., Lakovlev, D. and Uotinen, L.K.T.*

Support and Reinforcement

Dynamic Twisted Rockbolt for Underground Excavation in Deep Mine Conditions – *Pytel, W., Mertuszka, P. and Szeptun, K.*

An experimental study to investigate the interaction of backfill and rock mass – *Moser, A., Wallner, F., Wagner, H. and Ladinig, T.*

Quality Assessment of Backfill Performance for an Underground Iron Mine in Turkey – *Yardimci, A.G., Tutluoglu, L., Karpuz, C., Ozturk, H. and Guner, D.*

Scale Effect of Thin Spray-on Liners for Pillar Reinforcement – *Guner, D. and Ozturk, H.*

Theoretical investigation of the effect of stress on the performance of support systems based on RMR support recommendations – *Karakaplan, E., Basarir, H. and Wesseloo, J.*

Fiber Reinforced Spray Concrete: Minimum Performance Requirement to Meet Safety Needs – *De Rivaz, B.*

Ground Support and Reinforcement System Remediation at the Cethana Power Station, Tasmania, Australia – *Hills, P.B., Liang, M., Pennington, D. and Weller, J.*

Seismic/Dynamic Issues

Rockburst mechanism related to accelerating creep of rock triggered by dynamic disturbance – *Zhu, W., Wang, Q., Niu, L., Li, S. and Wei, J.*

Integrating microseismic and 3D stress monitoring with numerical modeling to improve ground hazard assessment – *Tonnelier, A., Bouffier, C., Renaud, V., Bigarre, P., Mozzaffari, S., Nyström, A. and Fjellström, P.*

Establishment of experimental sites in three Swedish mines to monitor the in-situ performance of ground support systems associated with mining-induced seismicity – *Zhang, P., Dineva, S., Nordlund, E., Hansen-Haug, J., and Woldemedhin, B.*

Scattering of SH-waves by a shallow circular lined tunnel with an imperfect interface – *Yi, C., Johansson, D. and Nyberg, U.*

Support Response

Sensor techniques to monitor installation and status of rock bolts – *Gustafsson, L.K.K.A.*

Production-blast-induced crosscut performance in a weak biotite schist: a comparison of three high-deformation bolt types – *Jones, T.*

Comparison between dynamic ground support methods (dynamic bolting) – *Näsi, J. and Harju, H.*

An instrumentation project to investigate the response of a ground support system to stoping induced deformation – *Sweby, G.J., Dight, P.M. and Potvin, J.*

Methodology for stability analysis of entry- type underground excavations – *Burgos, L., Vallejos, J.A. and Delonca, A.*

Support Design

Real-Time Rock Mechanical Measurements for Risk Assessment and Ground Support Optimisation in Underground Mines – *Ritala, F., Janiszewski, M., Uotinen, L. and Siren, T.*

A risk based approach to ground support design – *Joughin, W., Muaka, J., Mpunzi, P., Sewnun, D., Wesseloo, J.*

Roadways stability investigations in stratified rock – *Malkowski, P., Niedbalski, Z. and Majcherczyk, T.*

Optimisation of gateroad support at the depth more than 1000 m in hard coal mines – *Lubosik, Z., Prusek, S., Walentek, A. and Wrana, A.*

Selection of ground support for mining drives based on the Q-System – *Potvin, J. and Hadjigeorgiou, J.*

Pipe Umbrella System– Dimensioning and Design – *Strømsvik, H., Grøv, E. and Andersson, H.*
